

Company Profile

SASCO Steel Pvt. Ltd. saw the light of day in the year 1997. The company is an outcome of the vision to diversify from the field of construction to manufacturing, by Mr S N Singh and Mr S K Singh, Directors, Lakeshwari Builders Pvt. Ltd. Initially known as Singhbhum Alloy Steel Company, SASCO, since its inception, has embarked on a path of organic growth, improving upon its facilities, capacity and range of casted products. SASCO's journey through these years has been a slow and steady one, dotted with impediments. But, it has managed to carve a niche for itself. Spread across one acre of land, the company is an alloy steel foundry. Located in the Adityapur Industrial Area of Jamshedpur, SASCO manufactures a wide range of Alloy Steel Castings, including Hadfield and High Chrome Steel. Its customers comprise several companies in the following sector:

• Iron & Steel

• Cement

• Power

• Mining

• Iron Ore/ Stone Crushing

• Refractories

• Earth Moving Equipments/ Spares

The installed capacity of the SASCO unit is 2500 MT per annum for supplying castings, which weigh up to 1000 kg a piece. The SASCO Family

The Company has a combined work force of over 150 personnel, some of whom are hired on a contractual basis as well. There is an eclectic mix of qualified and experienced personnel and an enthusiastic management team, and each of them contributes towards the growth and prosperity of the organisation.
